Professional Profile

Results-driven web developer who enjoys developing beautiful, functional, and clean web applications, with a focus on front end and UX/UI. A creative problem solver with a keen understanding of programming languages, databases, frameworks, and systems deployment to maximize efficiency. Looking for a dynamic and creative work environment where I can continue to grow my skills and collaborate with fellow developers.

Technical Skills:

HTML5 | CSS3 | Bootstrap | Media Queries | Materialize | JavaScript | jQuery | GIT | Github | Google Firebase | Node.js | APIs | JSON | Command Line/GitBash | MySQL | Express.js | Handlebars

Experience:

LocalScoop (Durham, NC)   2018
Full Stack Developer
- A location-based news application which utilizes Google Maps Geolocation to find your news near your current location. It also displays the current local weather and, for fun, a nearby top-rated ice cream parlor.
- Users can move the marker to different locations to find news elsewhere. If they create an account (using Google Firebase user authentication), they can save favorite locations and access them again with the click of a button.
- Utilizes Materialize to style the front end and the following APIs:
    - News API
    - OpenWeatherMap API
    - Zomato API
- https://github.com/ashleyedds/LocalScoop
- https://ashleyedds.github.io/LocalScoop

Harry Potter and the Really Cool Trivia Game (Durham, NC)   2018
Front End Developer
- Created a Harry Potter themed trivia game playable in the browser
- JavaScript, jQuery, HTML5, CSS3, game logic
- https://github.com/ashleyedds/TriviaGame
- https://ashleyedds.github.io/TriviaGame

Reaction GIF Generator (Durham, NC)   2018
Front End Developer

- Created an application which creates buttons dynamically utilizing jQuery. By pressing a button, the user searches the GIPHY API and returns the 10 most popular GIFs of that specific reaction. They can create their own reaction-search buttons.
- Click a GIF to play it, click again to pause it.
- https://github.com/ashleyedds/GIFGenerator
- https://ashleyedds.github.io/GIFGenerator

Hangman.js (Durham, NC)   2018
Front End Developer
- Created an ACC Basketball themed hangman game playable in the browser
- Javascript, HTML5, CSS3, Bootstrap, game logic
- https://github.com/ashleyedds/Hangman-Game
- https://ashleyedds.github.io/Hangman-Game

Additional Experience:
- Speech-Language Pathologist
  Worked with acutely-ill adults in an inpatient hospital setting. Care focused on providing rehabilitation for patients who are unable to swallow safely and/or those who have cognitive or communication impairments.
  - Duke University Medical Center (Durham, NC)   2015-Present
  - Nash General Hospital (Rocky Mount, NC)   June 2014-February 2015
  - Rex Hospital, *Clinical Fellowship* (Raleigh, NC)   July 2013-May 2014

Education:
UNC-Chapel Hill, Chapel Hill, NC   2018
UNC Coding Program -- Full Stack Web Development
An intensive six-month long program dedicated to designing and building web applications.

East Carolina University, Greenville, NC   2013
M.S. Communication Sciences and Disorders
Accomplishments: Published a thesis which measured potential factors that may predict a persistent voice disorder after a thyroidectomy.
  - http://thescholarship.ecu.edu/handle/10342/1813

UNC-Chapel Hill, Chapel Hill, NC   2011
B.A. Communication Sciences and Disorders
      with a focus in Speech and Hearing Sciences
Second Major in Linguistics
Accomplishments: Graduated with honors and distinction
