Ashley Edds

252-425-5305 ◦ Durham, NC ◦ ashley@edds.net

https://linkedin.com/in/ashley-edds || https://github.com/ashleyedds || ashleyedds.com

Technical Skills:

HTML 5 | CSS 3 | Bootstrap | Materialize | JavaScript (ES6) | jQuery | GIT | Github | Google Firebase | Node.js | APIs | JSON | Command Line/GitBash | MySQL | Express.js | Handlebars | Sequelize | MVC Framework | Adobe Photoshop

Experience:

LocalScoop (Durham, NC)   2018
Full Stack Developer

- Architected a location-based news application for the web which utilizes Google Maps Geolocation and multiple APIs to display nearby news and weather. Firebase authentication allows the user to manage preferences, save locations, and improves usability across multiple site visits.
    - https://github.com/ashleyedds/LocalScoop
    - https://ashleyedds.github.io/LocalScoop

FriendFinder (Durham, NC)   2018
Full Stack Developer

- Created a web application utilizing Node.js and Express, which invites the user to respond to statements about themselves. This data is stored in a dynamically-created API and their scores are converted into a compatibility index, which is then used to match them to their most-compatible friend.
    - Deployed utilizing Heroku: https://guarded-ridge-21146.herokuapp.com/
    - https://github.com/ashleyedds/friendfinder

Reaction GIF Generator (Durham, NC)   2018
Front End Developer

- Designed a web-based application which creates buttons dynamically utilizing jQuery, searches the GIPHY API and returns the 10 most popular results.
    - https://ashleyedds.github.io/GIFGenerator/
    - https://github.com/ashleyedds/GIFGenerator

Work Experience:

- **Speech-language pathologist**
  Served as first point of contact for caregivers and acutely-ill patients and provided consultation on best plan of care in an inpatient hospital setting. Care focused on completing comprehensive evaluations and tailoring individualized treatment plans for patients who are unable to swallow

safely and/or those who have cognitive-communication impairments. Work also included collaboration with a multidisciplinary care team with surgeons, doctors, and other healthcare practitioners as well as teaming up with patients' families to reach the best outcome for the patient. Often creative problem solving and advocating for the less-than-obvious solution to find the intersection between patient wants and desired positive outcomes.

- Duke University Medical Center (Durham, NC)   2015-Present
- Nash General Hospital (Rocky Mount, NC)   June 2014-February 2015
- Rex Hospital *Clinical Fellowship* (Raleigh, NC)   July 2013-May 2014
